### PRIVATE EQUITY STRATEGIC INVESTMENT PLAN

# SAN BERNARDINO COUNTY EMPLOYEES' RETIREMENT ASSOCIATION

January 2020

Exhibit A: Page 2

## PRIVATE EQUITY OVERVIEW

#### PRIVATE MARKETS THOUGHTS & ACTIONS

#### **Private Markets Thoughts**

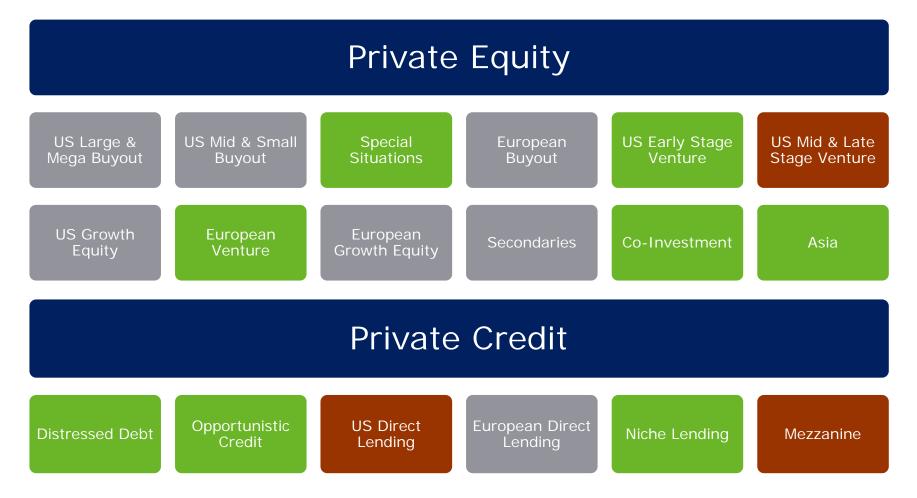

- Fundraising has continued to be robust and efficient—and early
- Valuations are still at cyclical highs, but capital put to work in 2019 vintage funds may see better buying opportunities
- Rising rates, deteriorating credit quality and overall credit levels portend a riskier future for performing credit
- Late cycle commitments often outperform mid-cycle ones that have not had the opportunity to de-risk

#### **Private Markets Actions**

- Actively manage portfolios: continue to deploy capital thoughtfully, with an eye toward preserving liquidity
- Prepare for distressed cycles with commitments to control-/influence-oriented managers with flexible mandates
- Continue to seek special situations and credit opportunity strategies predicated on flexibility, value and complexity
- Consider building venture exposure with both new and established top quartile managers

5	Strategy	Outlook	Commentary
	Developed Economies	Doo!#ive	Emphasize buyout strategies with managers that have strong sourcing networks, disciplined capital deployment and ability to drive value
	(Australia, South Korea and Japan)	Positive	Middle market funds provide attractive growth potential while larger funds can invest in industry leaders to drive consolidation or pursue cross-border expansion opportunities
Asia	Developing Economies		Emphasize growth equity strategies by partnering with strong entrepreneurs to expand businesses and develop management teams
	(China, India and Southeast Asia)	Positive	Early stage venture capital in China and India shifting from copy- cat business models to technology innovation
			Control deals are becoming more frequent as PE industry matures and growth slows, providing acquisition targets for buyout groups
Fund of Funds & Co-	Primary FOFs	Neutral	Use specialists to gain exposure to difficult to access segments and/or geographies; be aware of how co-investments and secondaries are being used within a primary fund of fund before committing
Investment Funds	Co-Investment Funds	Positive	Seek managers with demonstrated access to deal flow from high quality GPs and have a differentiated viewpoint on how they evaluate opportunities

Strategy		Outlook	Commentary							
	Distressed Debt	Positive	Consider strategies that can allocate capital opportunistically between geographies and asset classes							
Distressed Debt &	Distressed Debt	Positive	Favor distressed-for-control/influence strategies that can succeed in benign and highly distressed markets							
Opp. Credit.	* *	Positive	Opportunistic strategies can enhance returns in a low-rate environment compared to traditional fixed-income strategies							
		TOSITIVE	Find managers who can provide flexible capital solutions that can invest across various market conditions							
	Mezzanine	Negative	There are interesting opportunities on the non-sponsored side where managers can drive deal structures and terms							
	Niche Lending	Positive	Look for managers with specialization in particular sectors, industries and market segments which require additional expertise and which are often overlooked by traditional lenders							
Mezzanine & Direct Lending	US Lending	Negative	Relative attractiveness in the lower-to middle market (companies less than \$50m EBITDA); seek managers with historical discipline and transparency							
			Focus on fees and more liquid vehicle structures							
	Europe Lending	Neutral	Look for managers with an established platform and strong historical market share ("Tier 1" managers) that can navigate multiple markets

# SBCERA PACING RECOMMENDATION

#### NEPC RECOMMENDATION A: Page 9

• San Bernardino County Employee's Retirement Association ("SBCERA") should consider committing \$600 million to private equity in 2020 to achieve and maintain the target allocation.

#### Private Equity Allocation

- The investment policy has a target allocation to private markets of 16.0% with a permitted range of 6% to 21%.
- As of 9/30/19, there was approximately \$1.8 billion in private equity Net Asset Value ("NAV"), which translated to approximately 16.8% of the total SBCERA portfolio and was within the policy range.

#### PRIVATE EQUITY RECOMMENDATION

• NEPC recommends committing approximately \$600 million to private equity in 2020 with current MCA obligations included in this amount. Historical and expected MCA commitments are shown below.

Manager / Fund Name		2018	2019			2020		
Total PE Budget (Pacing Plan)	\$	500,000,000	\$	500,000,000	\$	600,000,000

Gramercy MCA	\$	70,000,000	\$	25,000,000	\$	25,000,000		
Industry Ventures MCA	\$	75,000,000	\$	100,000,000	\$	50,000,000		
Kayne Anderson MCA	\$	30,000,000	\$	100,000,000	\$	50,000,000		
Partners Group MCA PE	\$	40,000,000	\$	=	\$	50,000,000		
Pathway Capital MCA	\$	40,000,000	\$	102,000,000	\$	70,000,000		
Tennenbaum MCA	\$	50,000,000	\$	30,000,000	\$	-		
Waterfall MCA	\$	65,000,000	\$	=	\$	-		
Allocated PE Budget	\$	500,000,000	\$	372,000,000	\$	445,000,000		
Unallocated PE Budget	\$	-	\$	128,000,000	\$	155,000,000		

- The allocations will continue to be biased toward strategies with stronger early distribution characteristics. The \$600 million target will allow SBCERA to maintain target exposures while investing in private assets across all the sub-strategies including but not limited to distressed debt, direct lending, mezzanine debt, equity buyout, growth equity, and venture capital.
- These recommendations are intended to be used as a directional guideline based on market conditions and revisited annually.

- NEPC's private markets pacing analysis projects a potential level of future assets and cash flows for a single scenario based on a series of assumptions. This analysis is intended to help estimate future exposure levels. It is not a guarantee of future cash flows, appreciation or returns.
- The timing and amounts of projected future cash flows and market values of investments could vary significantly from the amounts projected in this pacing analysis due to manager-specific and industry-wide macroeconomic factors.
- Estimates of projected cash flows and market values for existing private markets commitments were made at the Fund level and do not incorporate any underlying portfolio company projections or analysis.
- The opinions presented herein represent the good faith views of NEPC as of the date of this report and are subject to change at any time.
- Data used to prepare this report was obtained directly from the investment managers and other third parties. While NEPC has exercised reasonable professional care in preparing this report, we cannot guarantee the accuracy of all source information contained within.

#### ALTERNATIVE INVESTMENT TO PROPERTY OF THE PROP

It is important that investors understand the following characteristics of non-traditional investment strategies including hedge funds and private equity:

- 1. Performance can be volatile and investors could lose all or a substantial portion of their investment
- 2. Leverage and other speculative practices may increase the risk of loss
- 3. Past performance may be revised due to the revaluation of investments
- 4. These investments can be illiquid, and investors may be subject to lockups or lengthy redemption terms
- 5. A secondary market may not be available for all funds, and any sales that occur may take place at a discount to value
- 6. These funds are not subject to the same regulatory requirements as registered investment vehicles
- 7. Managers may not be required to provide periodic pricing or valuation information to investors
- 8. These funds may have complex tax structures and delays in distributing important tax information
- 9. These funds often charge high fees
- 10. Investment agreements often give the manager authority to trade in securities, markets or currencies that are not within the manager's realm of expertise or contemplated investment strategy
