An investment in the referenced Bardin Hill funds (the "Funds") is speculative and involves a high degree of risk. Past performance is no indication of future results. There can be no assurance that the Funds' investment objectives will be achieved and investment results may vary substantially from year to year. The Funds may be leveraged and their performance may be volatile. An investor could lose all or substantially all of their investment. Bardin Hill has total trading authority over the Funds. There is no secondary market for an investor's interests in the Funds and none is expected to develop. There are restrictions on transferring interests in the Funds. The Funds' fees and expenses may offset the Funds' trading profits. Prospective investors should review the risks described in the Funds' private offering memoranda.

Affiliated funds and Bardin Hill principals, officers, and employees (including Bardin Hill executives) and their related family members and entities (collectively "Affiliates") are subject to the same liquidity terms as other investors in the Funds. Subject to these liquidity terms, Affiliates have made and may continue to make material increases or decreases in their Fund investments at any time without any disclosure by Bardin Hill to other investors in the Funds.

Please note that SBCERA's investments do not pay fees at the Gramercy Fund level because they are rolled up into a combined Master Custodial Agreement ("MCA") account at which fees and carried interest are assessed. Fund level fees reflect the actual amounts charged by the funds (which equal zero for SBCERA).

Please note that SBCERA's MCA expense caps reduce investor level expenses via rebates that occur outside of the fund. The reduced (pre-rebate) investor level values are shown above. Fund level expenses reflect the actual amounts charged by the funds (which exclude external rebates to SBCERA).

Disclosure

The foregoing information has been provided pursuant to a specific written request. Since it is only a summary in response to a specific written request, this document should not be the basis of an investment decision. An investment decision should be based on a thorough review and due diligence process, which should include, but not be limited to, a thorough review of all relevant term sheets and other offering and organizational documents as well as consultation with legal, tax and regulatory advisors. Any person making an investment must be able to bear the risks involved and must meet the relevant suitability requirements. Some or all alternative investment programs may not be suitable for certain investors. No assurance can be given that any fund, account or strategy will meet its investment objectives or avoid losses. Among the risks, which we wish to call to your attention, are the following:

Forward looking statements and position reporting: Unless otherwise indicated, the information in this document is NOT intended to contain or express exposure recommendations, guidelines or limits applicable to any fund, account or strategy discussed herein. The information in this document does not purport to present a complete picture of the financial position, activities, results, actions, or plans of any fund, account or strategy discussed herein. The information in this document does not disclose or contemplate the hedging or exit strategies of the relevant fund, account or strategy unless otherwise expressly noted. The information in this document is subject to change without notice. While investors should understand and consider risks associated with position concentrations when making an investment decision, this document is not intended to aid an investor in evaluating such risk unless otherwise expressly noted. A discussion of some, but not all, of the risks associated with investing in a fund, account or strategy can be found in the relevant private placement memorandum, subscription agreement, investment management agreement, and limited partnership agreement or articles of association, as applicable (collectively, the "Governing Documents"). Should there be a conflict between the terms set forth in the Governing Documents and any other term(s) set forth in this document or in any other materials, the Governing Documents are controlling in all respects with respect to an investment in a fund or account. Therefore, the Governing Documents must be reviewed carefully before making an investment and periodically while an investment is maintained. Statements made in this document may include forward-looking statements. These statements, including those relating to future financial expectations, are made based upon certain assumptions regarding risks and uncertainties that if untrue could cause actual results to differ materially from those in the forward-looking statements.

Investment Risks: The funds or accounts discussed in this document utilize speculative investment strategies that accept varying degrees of risk, including substantial degrees of risk in some cases. The funds, accounts or strategies may be leveraged and may engage in other speculative investment practices that may increase the risk of investment loss. Past performance results achieved by the investment manager, Marathon Asset Management LP ("Marathon"), on behalf of any fund, account or strategy is not necessarily indicative of any future performance that may be achieved by Marathon on behalf of any fund, account or strategy. Any fund's, account's or strategy's performance may be volatile and certain market and economic events having a positive impact on performance may not repeat themselves. The net asset value of any fund or account may go up as well as down. An investor could lose all or a substantial amount of his, her or its investment. Marathon has total trading authority over any fund or account unless otherwise expressly agreed, and the fund or account is dependent upon the services of Marathon. The investments of any fund, account or strategy may be concentrated and accordingly may lack diversification and, consequently, involve higher risk. The fund, account or strategy may have liquidity provisions and limitations that could restrict the ability of an investor to redeem their investment. There is no secondary market for investors' interests in any fund or account and none is expected to develop. There are restrictions on transferring interests in any privately offered fund. The fund's or account's fees and expenses may offset the fund's or account's trading and investment profits. The fund or account may not be required to provide periodic pricing or valuation information to investors with respect to individual investments. The fund or account is not a registered investment company and is not subject to the same regulatory requirements as mutual funds. All or a portion of the trades executed for the fund or account may take place on foreign markets. The fund or account may pursue strategies other than those described herein, and such other strategies may result in losses that offset any gains generated by the strategies described herein. The fund, or account is subject to conflicts of interest of Marathon and its affiliates. The Governing Documents of any fund or account set forth the terms of an investment in such fund or account and other material information, including risk factors, conflicts of interest, fees and expenses, and tax-related information. The Governing Documents must be reviewed prior to any determination to invest in any fund or account described herein. Investment decisions should be made solely in reliance on the Governing Documents of the relevant fund or account and investors should not rely upon any other information, representation or warranty of the fund or account, including without limitation any interviews, quotes, statements or comments of Marathon or any of its directors, officers, partners, members, employees, agents, legal representatives and controlling persons, including those made in a public forum or through any media outlet.

Performance Data: Unless otherwise indicated, performance data (if presented) is presented "net" of management fees and other fund expenses (i.e., legal and accounting and other expenses as disclosed in the relevant fund or account's Governing Documents) and "gross" of performance fees and/or incentive allocations, which, when deducted, would lower the reported rate of return. Returns may be unrealized, estimated and/or un-audited and reflect the reinvestment of dividends and other gains. Due to the format of data available for the time periods indicated, both gross and net returns may be difficult to calculate precisely. Accordingly, the calculations have been made based on a number of assumptions. Because of these limitations, the performance information should not be relied upon as a precise reporting of gross or net performance, but rather merely a general indication of past performance. The performance information presented herein may have been generated during a period of extraordinary market volatility or relative stability in the particular sector. Accordingly, the performance is not necessarily indicative of results that a fund, account or strategy may achieve in the future. In addition, the foregoing results may be based or shown on an annual basis, but results for individual months or quarters within each year may have been more favorable or less favorable than the results for the entire period, as the case may be. The value of unrealized investments has been determined in accordance with the valuation policies of the fund or account, but there can be no assurance that the value ultimately realized with respect to such investments will not vary materially from such estimates.

Individual returns may vary due to, among other things, fund class, date of initial investment and status of investor under new issue rules. Capital statements, which are provided monthly by Citco Fund Services, will indicate each investor's respective net asset value.

Indices: Unless otherwise indicated, market indices (if provided) are provided in this document for comparison purposes only and the comparison does not mean that there necessarily will be a correlation between the returns of any fund, account or strategy and any index. The indices have not been selected to represent an appropriate benchmark against which to compare any fund's, account's or strategy's performance; but, rather, are disclosed to allow for comparison of a fund's, account's or strategy's performance to that of certain well-known and widely recognized indices. The returns of the funds, accounts or strategies will differ from these various indices in that, among other reasons, the funds, accounts or strategies are actively managed and may use leverage. Such indices are unmanaged and are not subject to fees and expenses, including transactions costs, typically associated with private investment funds and accounts. In addition, the funds', accounts' or strategies' portfolios may differ from the portfolios that comprise the indices and the differences may be material. Typically, investments cannot be made directly in indices and such indices may re-invest dividends and income.

Categories and Classifications: Unless otherwise indicated, this document presents certain information of the funds, accounts or strategies in various categories and classifications that were determined by you or by Marathon, as applicable. The categories and classifications presented could be materially different from other third-party classification systems.

Opportunities: Investors should understand that economic conditions are changing constantly and portfolio composition is subject to change. No guarantee is made that any of the pipeline opportunities that may be presented in this document will materialize or that the funds, accounts or strategies will have the same types or diversity of investment opportunities in the future as they may have had in the past. Marathon seeks to capitalize on attractive opportunities wherever they might exist. Depending on conditions and trends in the capital markets and the economy, Marathon may pursue objectives or employ techniques it considers appropriate and in the best interest of the funds, accounts or strategies, which may differ from the objectives, techniques or investments presented in this document. Marathon is not limited with respect to the types of investment strategies it may employ or the markets or instruments in which it may invest, subject to the terms of the Governing Documents of any given fund or account.

Selected Trade Examples: As applicable, select transactions, trades, investments and other "drivers" of positive or negative performance discussed in this document (if any are so discussed) have been provided per your request for illustrative purposes only. The transactions discussed herein are not necessarily representative of the best performing transactions executed in the relevant fund, account or strategy. The information provided herein should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in any fund's, account's or strategy's portfolio at the time you receive this document or that securities sold have not been repurchased.

Hypothetical Performance: Hypothetical performance results, if presented, have many inherent limitations, some of which are described below. No representation is being made that any fund, account or strategy will or is likely to achieve profits or losses similar to those shown. In fact, there frequently are sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they generally are prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can account completely for the impact of financial risk in actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which also can adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results.

Not Legal, Accounting or Regulatory Advice: This document is not intended to represent the rendering of accounting, tax, legal or regulatory advice. A change in the facts or circumstances of any transaction could materially affect the accounting, tax, legal or regulatory treatment for that transaction. The ultimate responsibility for the decision on the appropriate application of accounting, tax, legal and regulatory treatment rests with the investor and his, her or its accountants, tax and regulatory advisors. Investors should consult and must rely on their own professional tax, legal and regulatory advisors as to matters concerning the depicted fund, account or strategy and their investments in the fund, account or strategy. Prospective investors should inform themselves as to: (1) the legal requirements within their own jurisdictions for the purchase, holding or disposal of securities or other assets; (2) applicable foreign exchange restrictions; and (3) any income and other taxes which may apply to their purchase, holding and disposal of securities or other assets or payments in respect of the securities of any depicted fund, account or strategy.

Not an Offer and Confidential: This document is provided for your internal use only. The information contained herein is proprietary and confidential to Marathon and may not be disclosed to third parties or duplicated or used for any purpose other than the purpose for which it has been provided. Any unauthorized use, duplication or disclosure of this document is prohibited. Although the information provided on the preceding pages has been obtained from sources which Marathon believes to be reliable, Marathon does not guarantee its accuracy, and such information may be incomplete or condensed. All information is presented only as of the indicated date, and Marathon does not undertake an obligation to update any information provided as of any date after the indicated date. This document is for information purposes only and is not intended as an offer or solicitation with respect to the purchase or sale of any security or of any interest in any fund Marathon or its affiliates manage or offer. Marathon shall not be liable for any damages arising out of any inaccuracy in the information in this document, subject to applicable law.

Year end quarterly reports are released to investors approximately 150 days after year end, owing to the inclusion of DOF II's financial statements, audited by PricewaterhouseCoopers LLP. In an effort to ease the lag time on quarterly reporting, Siguler Guff provides investors with capital account estimates approximately 30 days after the end of each quarter. Please note: DOF II was fully liquidated as of December 31, 2019.

Additional information on performance calculations. Past performance does not guarantee future results. No representation or warranty, express or implied, is made regarding future performance. Most performance calculations rely to a significant extent on the value of Fund's unrealized investments and those of the underlying portfolio funds. The market prices of publicly-traded securities can be extremely volatile, and therefore might fluctuate significantly after the valuation date. A variety of methods are used to value securities that are not publicly-traded, with the methodologies and underlying assumptions selected by the relevant investment manager (which might create a bias toward a higher valuation). Furthermore, business or economic developments after a valuation date could significantly change the value for any particular investment. Accordingly, an investment might ultimately be sold for less than its unrealized valuation. Siguler Guff derives information about the investments of underlying portfolio funds, including investment valuations, from the underlying portfolio fund manager, without independent verification. The managers of the underlying portfolio funds have not reviewed or approved this Presentation and Siguler Guff makes no representations as to the accuracy or completeness of any of the information herein. Siguler Guff funds are structured to have parallel partnerships that address the tax and structural concerns of specific investor types. Unless otherwise noted, Siguler Guff funds' returns are consolidated across all parallel partnerships.

Various investors in a pooled investment fund may pay management fees at different rates, as a result of management fee "breakpoints" based on the size of the investment, or negotiated fee reductions contained in side letters or similar agreements. Because Siguler Guff calculates net performance for pooled investment funds based on the aggregate fees and expenses paid by the fund, net performance data reflects the "blended" management fee rate paid by all investors in the aggregate. To the extent that the account of a particular pooled investment fund investor is charged management fees at a rate higher than that blended rate, that investor's net performance would be lower than the performance shown in this presentation. Investments by the general partner of pooled investment funds, and by individuals and entities affiliated with the general partner, are not assessed management fees. The investments of these individuals and entities are excluded from the net performance calculation, and thus do not reduce the blended management fee rate when Siguler Guff calculates net performance.

Net performance takes into account management fees, expenses and carried interest at both the portfolio investment (i.e. underlying portfolio fund or direct investment) and Siguler Guff level. Carried interest at the Siguler Guff level is calculated as though the fund sold its entire portfolio at its carrying value on the last day of the period. Portfolio level performance information is gross and takes account of management fees, expenses and carried interest at the portfolio investment (i.e. underlying portfolio fund or direct investment) level, but does not deduct management fees, expenses and carried interest at the Siguler Guff level. The effect of these deductions could be significant. Investors should consider gross performance information together with the corresponding net performance. Gross performance information does not deduct management fees, expenses and carried interest at the portfolio investment (i.e. underlying portfolio fund or direct investment) level, or at the Siguler Guff level. The effect of these deductions could be significant. Investors should consider gross performance information together with the corresponding net performance.
